

RBA—Appalachian Mountain Ministry

May 2019-Newsletter

Pete Soots, Director

This has been a sad month for the RBA Appalachian Mountain Ministry. We lost a beautiful and giving woman who devoted all of her later years into supporting the poor especially the children of the Appalachian Mountains. Ms. Ann Lovorn was a true servant of God and she gave every bit of strength she had to the ministry until Her Heavenly Father called her home to rest with Him for eternity. She will be forever missed.

We are having a banner year; the public has been wonderful to provide goods to the ministry that we have been able to share. We have acquired a new partnership in our ministry through the North American Mission Board in Ruston, Louisiana. We have taken 4 semi loads over to them plus one of ours this year and through the generous giving, we have not failed to support all areas that we normally support. I believe this ministry will be a ministry that will allow us to be greater supporters of ministry in the RBA Association.

We are awaiting the information on backpacks as we are well aware that people are waiting on the information so that they can begin getting the materials they need and pack the backpacks before other projects interfere with one another and that is very easy to happen in an association that is as busy as ours is.

We have opened up an automated way that people can give on line to the Appalachian Mountain Ministry through our web page "RBA Appalachian Mountain Ministry @ Weebly.com You can give on several of the pages and anyone who would like to serve this ministry through financial means to use the on line giving. You can choose to give 25,50,75, 100 and 500. This account is used for only those things that allows us to pack and ship the goods to the mountains and the delta of Louisiana. There are no overhead items that are purchased through this account. You will be forwarded a letter for tax purposes for your records. Please consider supporting this very worth well program.

Serving a loving God.

Pete Soots and the Appalachian Mountain Ministry Team.
